PROJECTS
Resource Center |
GH: https://github.com/broken-guitar/project-3 | Deployed: https://serene-kobuk-valley-06720.herokuapp.com/
- Mobile responsive resource center for companies to store useful links and notes.
- Worked directly on frontend with home page styling/format, icon images, navbar & button styling, and mobile responsiveness. Also supported backend work with API calls to the database to get resources and mapping over the returned data/structuring it to serve to the front end.
- React.js, Node.js, MongoDB, Mongoose, Express, Axios, JavaScript, JQuery, HTML, CSS, Bootstrap, React-Bootstrap, React-Dom, React-Icons, Heroku, bcrypt, nodemailer, dotenv

CommunityFIRST |
GH: https://github.com/aaron-G18/CommunityFirst | Deployed: https://communityfirst.herokuapp.com/
- Web app where users can create and view community events.
- Directly work on frontend JavaScript logic for CRUD operations via AJAX calls. Also formatted Handlebars structure.
- HTML, CSS, JavaScript, JQuery, Node.js, Express, Express Handlebars, Mocha/Chai, Travis CI, ESLint, MySQL, Sequelize, bcrypt, cookie-parser

EXPERIENCE
District Business Operations Support / Assistant Manager   2016 - Current
Refrigeration Supplies Distributor   Roseville, CA
Successfully created and implemented district wide inventory loss management programs that resulted in saving the company thousands of dollars quarterly and significantly reducing man hours spent tracking/researching. Effectively generated information and materials that proved valuable in training employees. Efficiently supported outside sales staff and specialists, and assisted in successfully landing several key accounts.

Application Engineer   2011 - 2016
Refrigeration Supplies Distributor - Total Control Division   Tigard, OR
Meticulously designed, created, and tested building automation applications, programming, and graphical user interfaces that went above and beyond customer expectations. Diligently produced documentation to support end users/customers that was essential for completion of projects. Adeptly integrated field controllers with global controller/front end to create seamless user experiences. Attentively coordinated between service technicians, IT professionals, and end-users to keep projects on track and profitable. Received certificates for: BACnet MS/TP communications protocol, PCT/CCT configuration/engineering

EDUCATION
Certificate in Full Stack Web Development: UC Berkeley, Berkeley, CA
